

Executive Council Resolution No. (134) for the year 2025

Special Electricity Tariff for those connected to the transmission network of Emirates Global Aluminium

Having reviewed Executive Council Resolution No. (40) for the year 2023 concerning a special tariff for those connected to the electricity transmission network, the Executive Council has decided the following:

1. Approval to apply a special electricity tariff for those connected to the transmission network of Emirates Global Aluminium with a tariff ranging from 12 to 21 Fils/kWh.
2. To instruct the Department of Energy to coordinate with Emirates Global Aluminium and Emirates Water and Electricity Company as follows:
 - Ensuring that Emirates Global Aluminium continues to bear and pay the costs of carbon emission removal.
 - Commitment to ensure the reduction of government subsidy by an average of at least (34) million dirhams annually.
 - Enabling Emirates Water and Electricity Company to benefit from the gas contract transferred to it from Emirates Global Aluminium, without restricting its use only to the station to which it is transferred.
3. To instruct the Department of Energy to review the tariff every five years and submit its recommendations to the Executive Council.

Saif Saeed Ghobash
Secretary General
